

SUMMER

ASSIGNMENTS

Dear 5th Grade Parents,

The summer math assignment for 5th grade students going into 6th grade will be completed on a website called “Sara by Ray Dass”. It is a web-based math program that was created to review instruction and provide a learning experience that is enriching to all students.

The students will be assigned lessons to review and develop skills in math. We request that the students spend at least 60 minutes a week working on these assigned lessons. They do not need to complete every lesson assigned, but they should be working on these lessons during their weekly 60 minutes. The goal is not the quantity of lessons completed, but the quality of their work.

To log into the website, please go to sara.raydass.com and click login, enter the username and password.
